**AN AID TO THE IDENTIFICATION OF THE SOUTH AMERICAN  
SPECIES OF *AMPHISBAENA* (SQUAMATA, AMPHISBAENIDAE)**

P. E. Vanzolini

**ABSTRACT**

*A matrix of meristic characters is presented to orient the identification of South American Amphisbaena. Complementarily is given a checklist containing the citation of the original description, the type locality, identified, and a citation of a modern description useful to the identification.*

**KEYWORDS:** *Amphisbaena*, identification.

**RESUMO**

*O trabalho consiste de uma matriz de caracteres merísticos, destinada a orientar a identificação das espécies sul americanas de Amphisbaena. Complementarmente é apresentada uma lista remissiva contendo a citação original, a localidade tipo, identificada, e a citação de uma descrição recente útil à identificação.*

**PALAVRAS-CHAVE:** *Amphisbaena*, identificação

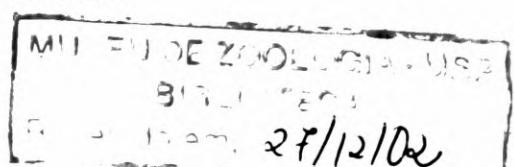

**INTRODUCTION**

The species of *Amphisbaena* are relatively easy to identify based on meristic characters. This sort of approach indicates a matrix format as more

Trabalho recebido para publicação em 12.IV.2002 e aceito em 11.IX.2002.

adequate than dichotomous keys, such as given in Peters & Donoso-Barros (1986). The matrix here presented is arranged according to the succession of steps taken in our laboratory.

It starts with the number of preanal pores, sequentially ordered, and proceeds through the usual scale counts: body annuli, tail annuli, autotomy level, number of dorsal and ventral segments to a midbody annulus. The scale count ranges presented are from the literature and from our own collection (37 identified South American species, ca. 1700 specimens). A brief indication of geographical range is given for a first check of the plausibility of the identification. This procedure usually results in a quick and reliable identification, but this cannot be considered completed without reference to a good detailed description of the species; a list of easily available ones is contained in the appended checklist, which additionally mentions the original description and the type locality (geographical coordinates mostly researched by myself).

This matrix has been in use in our laboratory for the last twenty years, and has proved easy and satisfactory to use.

#### CHECKLIST

*Amphisbaena alba* Linnaeus, 1758 (p. 228).

Type locality, "America".

Reference: Gans 1962a.

*Amphisbaena albocingulata* Boettger, 1885 (p. 219).

Type locality, "Paraguay".

Reference: Gans 1966 (*A. prunicolor albocingulata*).

*Amphisbaena anaemariae* Vanzolini, 1997 (p. 66).

Type locality, Brasil: Goiás: Serra da Mesa, Ponto 2 (14°02'S, 48°13'W).

*Amphisbaena angustifrons* Cope, 1861 (p. 76).

Type locality, Argentina: Buenos Aires: Buenos Aires (34°38'S, 58°28'W).

References: Gans 1965; Gans and Diefenbach 1972.

*Amphisbaena arenaria* Vanzolini, 1991 b (p. 350).

Type locality, Brasil: Bahia: Raso da Catarina (09°42'S, 38°31'W).

*Amphisbaena bolivica* Mertens, 1929 (60).

Type locality, Bolivia: Tarija: Villa Montes (21°15'S, 63°30'W).

Reference: Montero 1996.

Reference: Gans 1966.

*Amphisbaena myersi* Hoogmoed, 1989 (p. 67).

Type locality, Surinam: Jodensavanne ( $05^{\circ}25'N$ ,  $54^{\circ}59'W$ ).

*Amphisbaena neglecta* Dunn and Piatt, 1936 (p. 527).

Type locality, Brasil: Mato Grosso: Chapada, now Chapada dos Guimarães ( $15^{\circ}26'S$ ,  $55^{\circ}45'W$ ).

Reference: Vanzolini 1997.

*Amphisbaena nigriceps* Gans, 1966 (p. 252).

Type locality, Brasil: Espírito Santo: Refúgio Sooretama ( $19^{\circ}00'S$ ,  $40^{\circ}00'W$ ).

*Amphisbaena occidentalis* Cope, 1876 (p. 176).

Type locality, Peru: Libertad: Valle de Jequetepeque ( $07^{\circ}22'S$ ,  $79^{\circ}34'W$ ).

Reference: Gans 1961 (subspecies).

*Amphisbaena pericensis* Noble, 1921 (p. 141).

Type locality, Peru: Cajamarca: Perico ( $05^{\circ}21'S$ ,  $78^{\circ}47'W$ ).

Reference: Gans 1963c.

*Amphisbaena plumbea* Gray, 1872 (p. 36).

Type locality, Argentina: Mendoza: —.

Reference: Parker 1928.

*Amphisbaena polygrammica* Werner, 1901 (p. 5).

Type locality, Peru: Junin: Chanchamayo ( $11^{\circ}04'S$ ,  $75^{\circ}19'W$ ).

*Amphisbaena pretrei* Duméril and Bibron, 1839 (p. 486).

Type locality, "Brasil".

Reference: Gans 1965c.

*Amphisbaena prunicolor* (Cope, 1885).

*Aporarchus prunicolor* Cope, 1885: 189.

Type locality, Brasil: Rio Grande do Sul: São João do Montenegro, now Montenegro ( $29^{\circ}42'S$ ,  $51^{\circ}28'W$ ).

Reference: Gans 1966 (subspecies).

*Amphisbaena ridleyi* Boulenger, 1890 (p. 481).

Type locality, Brasil: Archipelago of Fernando de Noronha; ? West Indies: Porto Bello. Restricted to Fernando de Noronha by Gans 1963d.

Note: this species is endemic to an oceanic archipelago, and should not properly be included here; it is included only as a matter of convenience.

*Amphisbaena rozei* Lancini, 1963 (p. 1).

Type locality, Venezuela: Bolívar: headwaters of Caño Majagua (enters the Rio Chipurá at  $05^{\circ}30'N$ ,  $64^{\circ}40'W$ ).

*Amphisbaena sanctaeritae* Vanzolini, 1994 (p. 29).

Type locality, Brasil: São Paulo: Santa Rita do Passa Quatro ( $21^{\circ}42'S$ ,  $47^{\circ}28'W$ ).

*Amphisbaena silvestrii* Boulenger, 1902 (p. 287).

Type locality, Brasil: Mato Grosso: Cuyabá (= Cuiabá) ( $15^{\circ}36'S$ ,  $56^{\circ}05'W$ ).

Reference: Vanzolini 1997.

*Amphisbaena slateri* Boulenger, 1907 (p. 487).

Type locality, Peru: Puno: Valley of the Rio San Gabán (enters the Rio Inambari at  $13^{\circ}25'S$ ,  $70^{\circ}18'W$ ).

Reference: Gans 1967a.

*Amphisbaena slevini* Schmidt, 1936 (p. 31).

Type locality, Brasil: Amazonas: Manaus ( $03^{\circ}07'S$ ,  $60^{\circ}00'W$ ).

Reference: Gans 1963.

*Amphisbaena spurrelli* Boulenger, 1915 (p. 659).

Type locality, Colombia: Chocó: Andagoya ( $05^{\circ}06'N$ ,  $76^{\circ}40'W$ ).

Reference: Gans 1962.

*Amphisbaena stejnegeri* Ruthven, 1922 (p. 1).

Type locality, Guyana: Demerara: Vreed en Rust ( $06^{\circ}27'N$ ,  $58^{\circ}19'W$ ).  
Reference: Gans 1963b.

*Amphisbaena talisiae* Vanzolini, 1995 (p. 217).

Type locality, Brasil: Mato Grosso: Serra da Pitomba ( $15^{\circ}49'S$ ,  $52^{\circ}10'W$ ).

*Amphisbaena trachura* Cope, 1885 (p. 189).

Type locality, Brasil: Rio Grande do Sul: São João do Montenegro, now Montenegro ( $29^{\circ}42'S$ ,  $51^{\circ}28'W$ ).

## EDITORIAL COMMITTEE

**Editor-in-Chief.** Hussam Zaher, Serviço de Vertebrados, Museu de Zoologia, Universidade de São Paulo, Caixa Postal 42594, 04299-970, São Paulo, SP, Brazil. E-mail: [hzaher@ib.usp.br](mailto:hzaher@ib.usp.br).

**Associated Editors.** Mario C. C. de Pinna (Universidade de São Paulo, Brazil), Antonio C. Marques (Universidade de São Paulo, Brazil), Sergio A. Vanin (Universidade de São Paulo, Brazil).

**Editorial Board.** Adriano Kury (Museu Nacional do Rio de Janeiro, Brasil), Aziz N. Ab-Saber (Universidade de São Paulo, Brazil), Carlos Roberto F. Brandão, (Universidade de São Paulo, Brazil), Christian de Muizon (Muséum National d'Histoire Naturelle, France), Darrel Frost (American Museum of Natural History, U.S.A.), Gerardo Lamas (Museu Javier Prado de Lima, Peru), H. R. Heyer (National Museum of Natural History, U.S.A.), James Carpenter (American Museum of Natural History, U.S.A.), James Patton (University of Berkeley, U.S.A.), John Maisey (American Museum of Natural History, U.S.A.), Marcos Raposo (Museu Nacional do Rio de Janeiro, Brazil), Marcos Tavares (Universidade Santa Ursula, Brazil), Mario de Vivo (Universidade de São Paulo, Brazil), Miguel T. U. Rodrigues (Universidade de São Paulo, Brazil), Naércio Menezes (Universidade de São Paulo, Brazil), Nelson Papavero (Museu Paraense Emílio Goeldi, Brazil), Olivier Rieppel (Field Museum of Natural History, U.S.A.), Paulo E. Vanzolini (Universidade de São Paulo, Brazil), Paulo Young (Museu Nacional do Rio de Janeiro, Brazil), Ralf Holzentahl (University of Minesotta, U.S.A.), Randahl Schuh (American Museum of Natural History, U.S.A.), Ricardo Macedo Correa e Castro (Universidade de São Paulo, Brasil), Richard Prum (University of Kansas, U.S.A.), Richard Vari (National Museum of Natural History, U.S.A.), Rudiger Bieler (Field Museum of Natural History, U.S.A.), Ubirajara Martins (Universidade de São Paulo, Brasil), Walter A. P. Boeger (Universidade Federal do Paraná, Brasil).

## INSTRUCTIONS FOR AUTHORS

**General Information.** *Papéis Avulsos de Zoologia* (PAZ) covers primarily the fields of Zoology, publishing original contributions in systematics, paleontology, evolutionary biology, ecology, taxonomy, anatomy, behavior, functional morphology, molecular biology, ontogeny, faunistic studies and biogeography. PAZ also encourages submission of theoretical and empirical studies that explore principles and methods of systematics.

All contributions must follow the International Code of Zoological Nomenclature and relevant specimens should be properly curated and deposited in a recognized public or private, non-profit institution. Tissue samples should be referred to their voucher specimens and all nucleotide sequence data (aligned as well as unaligned) should be submitted to Genbank (<http://www.ncbi.nlm.nih.gov/genebank/>) or EMBL (<http://www.ebi.ac.uk/>).

**Peer Review.** All submissions to PAZ are subject to review by at least two referees and the Editor-in-Chief. Three legible copies (including photocopies of original illustrations) and original illustrations must be submitted; all authors will be notified of submission date. Authors may suggest potential reviewers. Communications regarding acceptance or rejection of manuscripts are made through correspondence with the first or corresponding author only. Once a manuscript is accepted providing changes suggested by the reviewers, the author is requested to return a revised version incorporating those changes (or a detailed explanation of why reviewer's suggestions were not followed) in four weeks upon receiving the communication by the editor. Revised manuscripts must be submitted as both hard copy and electronic file (3.5" disk, Zip Drive, or CD-Rom with text in Microsoft Word format).

**Proofs.** Page-proofs with the revised version will be sent to the first or corresponding author. Page-proofs must be returned to the editor in two weeks, preferably within 48 hours. Failure to return the proof promptly may be interpreted as approval with no changes and/or may delay publication. Only necessary corrections in proof will be permitted. Once page proof is sent to the author, further alterations and/or significant additions of text are permitted only at the author's expense or in the form of a brief appendix ("note added in proof").

**Submission of Manuscripts.** Manuscripts should be sent to the Editor-in-Chief (H. Zaher, Museu de Zoologia da USP, Caixa Postal 42694, CEP 04299-970, São Paulo, SP, Brasil). Manuscripts are considered on the understanding that they have not been published or will not appear elsewhere in substantially the same or abbreviated form. The criteria for acceptance of articles are quality and relevance of research, clarity of text, and compliance with the guidelines for manuscript preparation.

Manuscripts should be written preferentially in English, but texts in Portuguese or Spanish will also be considered. Studies with a broad coverage are encouraged to be submitted in English. All manuscripts should include abstracts in Portuguese and English regardless of the original language.

Authors are requested to pay attention to the instructions concerning the preparation of the manuscripts. Close adherence to the guidelines will expedite processing of the manuscript, whereas manuscripts deviating from the required form will be returned for revision prior to review.

# Papéis Avulsos de Zoologia

**Manuscript Form.** Manuscripts should not exceed 100 pages of double-spaced typescript on 21 by 29.7 cm (A4 format) or 21.5 by 28 cm (letter format) paper, with wide margins. The pages of the manuscript should be numbered consecutively.

The text of articles should be arranged in the following order: title page, abstract, body of text, literature cited, tables, appendices, and figure captions. Each of these sections should begin on a new page. All typescript pages must be double-spaced.

- (1) *Title page:* This should include the title, author(s) name(s), institutions, and key words in English as well as in the language of the manuscript, and a short running title in English. The title should be concise and, where appropriate, should include mention of families and/or higher taxa. Names of new taxa should not be included in titles.
- (2) *Abstract:* All papers should have an abstract in English, regardless of the original language. The abstract is of great importance as it may be reproduced elsewhere. It should be in a form intelligible if published alone in conjunction with the title and should summarize the main facts, ideas, and conclusions of the article. Indicative abstracts are strongly discouraged. Include all new taxonomic names for referencing purposes. Abbreviations should be avoided. It should not include references. Abstracts should not exceed 350 words.
- (3) *Body of text:* The main body of the text should include the following sections: Introduction, Materials and Methods, Results, Discussion and Acknowledgments at end. Primary headings in the text should be in capital letters and centered; the following text should begin on the next line, indented. Secondary headings should be in capital and lowercase letters and flush left; the following text should begin on the next line, indented. Tertiary headings should be in capital and lower case letters, in italics and indented; the following text should be on the same line and separated from the heading by a hyphen.
- (4) *Literature cited:* Citations in the text should be given as: Silva (1998)..., Silva (1998: 14-20)..., Silva (1998: figs. 1, 2)..., Silva (1998a, b)..., Silva and Oliveira (1998)..., (Silva, 1998)..., (Rangel, 1890; Silva and Oliveira, 1998a, b; Adams, 2000)..., (Silva, pers. comm.)..., (Silva et al., 1998), the latter when the paper has three or more authors. The reference need not be cited when author and date are given only as authority for a taxonomic name. The literature section should be arranged strictly alphabetically and given in the following format:

**Journal Article** – Silva, H. R., H. Oliveira & S. Rangel. Year. Article title. Journal name, 00:000-000. Names of journals must be spelled out in full.

**Books** – Silva, H. R. Year. Book title. Publisher, Place, 000 pp.

**Articles in Books** – Silva, H. R. Year. Article title; pp. 000-000. In: H. Oliveira & S. Rangel (Eds.), Book Title. Publisher, Place.

**Articles in Larger Works** – Silva, H. R. Year. Article title; pp. 000-000. In: H. Oliveira & S. Rangel (Eds.), Title of Larger Work. Serial Publication 00. Publisher, Place.

**Dissertations and Theses** – Silva, H. R. Year. Dissertation title. Ph.D. dissertation, University, Place, 000 pp.

**Tables.** All tables must be numbered in the same sequence in which they appear in the text. Authors are encouraged to indicate where the tables should be placed in the text. They should be comprehensible without reference to the text. Tables should be formatted with horizontal, not vertical, rules. In the text, tables should be referred as Table 1, Tables 2 and 3, Tables 2-6. Use “TABLE” in the table heading.

**Illustrations.** Figures should be numbered consecutively, in the same sequence they appear in the text. Separate illustrations of a composite figure should be identified by capital letters and referred in the text as so (fig. 1A). Where possible, letters should be placed in the lower right corner of each illustration of a composite figure. Hand-written lettering on illustrations are unacceptable. Illustrations should be mounted on stout, white cardboard. Figures should be mounted in order to minimize blank areas between separate illustrations. High quality color or black and white photographs, and computer generated figures are preferable. Authors are encouraged to indicate where the figures should be placed in the text. Use “(Fig(s).)” and “Figure(s)” for referring to figures in the text, but “FIGURE(S)” in the figure captions and “(fig(s).)” when referring to figures in another paper.

*For other details of manuscript preparation of format, consult the CBE Style Manual, available from the Council of Science Editors (<http://www.councilscienceeditors.org/pubs>).*
