

FOREWORD

As for Vol.2 no.4, this issue of Resenhas contains another *facsimile* of one of the important papers on topological tensor products written by A. Grothendieck when he was a visiting professor at the Department of Mathematics of the “Faculdade de Filosofia, Ciências e Letras” of the University of São Paulo. This paper was originally published in the “Boletim da Sociedade Matemática de São Paulo”, vol. 8, December of 1953.
